

Peach Facial Moisturizer

#SC-103

Size: 2 ounces

Peach Facial Moisturizer by Blue Spring is a unique combination of 4 nourishing oils: Jojoba, Emu, Safflower and Vitamin E Tocopheral. This exclusive blend is combined with Whole leaf Aloe Vera to produce the following beneficial results:

- Improves skins appearance to be soft, supple and even in skin tone
- Hydrates skin
- Diminishes the appearance of fine lines
- Provides younger, smoother and more flexible looking skin
- Reduces visible signs of aging
- Improves the appearance of scars, burns, wrinkles and damaged skin
- Deeply soothes, softens and moisturizes
- Attracts moisture to skin
- Dissolves dead skin and increases cell turnover
- Increases cell's ability to utilize oxygen to combat signs of aging
- Encourages healing of damaged skin

The positive qualities of Peach Facial Moisturizer by Blue Spring are:

- Non-oily
- Absorbs quickly
- Pleasant mild fragrance of fresh peaches
- Beneficial for inflamed or sensitive skin as well as mature or delicate skin
- Convenient 2 ounce size
- Directions for use:

Directions for use: Apply morning and evening on face and neck.

Tips for best use:

- Apply thin coats more frequently instead of a large amount at one time
- Peach Facial Moisturizer is also best used with our exclusive under-eye cream, White Stuff Under Eye Cream

Product Ingredients: Whole Leaf Aloe Vera Concentrate, Purified Water, Glyceryl Stearate, PEG 100 Stearate, Propylene Glycol, Glycereth-26, Cetyl Alcohol, Stearic Acid, Emu Oil, Safflower Oil, Jojoba Oil, Pseudocollagen, Sodium PCA, Lactic Acid, Hydrolyzed Elastin, Hydrolyzed Mucopolysaccharides, Revitalin, Polysorbate-20, Carbomer, Triethanolamine, Methylparaben, Fragrance, Imidazolidinyl Urea, Propylparaben, Tocopherol, D&C Red No. 33, FD&C Yellow No. 6

Peach Facial Moisturizer

Whole Leaf Aloe Vera Concentrate - Aloe Vera is used externally to treat various skin conditions such as cuts, burns and eczema. It is commonly believed that sap from Aloe vera eases pain and reduces inflammation.

Purified Water

Emu Oil - Emu Oil used topically as a unique, 100% natural moisturizer. Emu oil reduces the visible signs of aging.

Safflower Oil - A highly moisturizing oil with an exceptionally high amount of Oleic acids. It is deeply soothing and one of the first choices for skin care recipes requiring moisturizing benefits.

Jojoba Oil - It is wonderful for the skin because it has absorption properties that are similar to our skins own sebum (skins natural oil). It is used effectively for skin and hair to: cleanse; condition; soften; reduce wrinkles and stretch marks; lighten and help heal scars; promote healthy scalp and hair; lubricate and protect skin and hair

Pseudocollagen - A true moisturizing glycoprotein taken from living cells. It provides excellent moisturizing properties giving skin a more supple, healthy appearance.

Lactic Acid - Lactic acid is an Alpha-hydroxy acid. Alpha-hydroxy acids are derived from sugars. Lactic Acid is derived from milk. Lactic Acid works naturally at the very base of the epidermis (the outer layer of skin that is made of dead, flat skin cells that shed about every 2 weeks). Lactic Acid works by dissolving the cement that holds dead skin cells together, which increases cell turnover and influences the structure of new skin being made. The resulting skin is then softer, more flexible, smoother, less wrinkled, more hydrated and more even in tone.

Hydrolyzed Elastin - A moisturizing agent, derived from the protein elastin. Used to improve moisture and elasticity.

Hydrolyzed Mucopolysaccharides - A natural component of the skin, it used for its water-binding properties.

Revitalin - A known cell metabolism booster that renders a healthy glow to the skin. It increases the cell's ability to utilize oxygen, which allows nutrients to be absorbed by the cells to combat the signs of aging.

Triethanolamine - This ingredient is an organic chemical compound used as a pH balancer.

Tocopherol - Tocopherol, or vitamin E, is a fat-soluble vitamin that is an important antioxidant. Often used because it is commonly believed to play a role in encouraging skin healing and reducing scarring after injuries such as burns.

Glyceryl Stearate - Glyceryl Stearate serves as an emulsifier and is used to soften and smooth the skin.

Propylene Glycol - Propylene glycol is a derivative of natural gas and is commonly used in a variety of consumer and food products, including deodorants, pharmaceuticals, moisturizing lotions, and fat-free ice cream and sour cream products. It forms the base for some of our products and has a long history of safety.

Glycereth-26 - A natural emollient form of glycerin, a natural humectant, meaning it attracts moisture to your skin.

Inactive Ingredients: Cetyl Alcohol, Stearic Acid, Sodium PCA, Polysorbate-20, Carbomer, Methylparaben, Imidazolidinyl Urea, Propylparaben, PEG 100 Stearate, Fragrance, D&C Red No. 33, FD&C Yellow No. 6
