

## Body Moisturizer with Emu Oil

#SC-107

**Size:** 8 ounces

Used daily, Body Stuff helps keep the skin moisturized, soft and supple, as Body Stuff is a skin care cream with Emu Oil and Aloe Vera to help soothe and soften problem dry skin. Body Stuff's non-oily formula dries quickly, instantly soothing your skin while providing long lasting moisturizing protection for dry skin.

Aloe Vera (long recognized for its soothing properties) is the most popular cosmetic and toiletry ingredient in the United States according to the Cosmetic, Fragrance, and Toiletry Association (CTFA). Aloe vera is even used in tissues to soothe the dry irritated nose.

Aloe Vera contains up to 96% water and many moisture retentive polysaccharides. Scientists have isolated glucose, mannose, arabinose, galactose and xylose polysaccharides from Aloe Vera constituents. Polysaccharides are known to act as moisturizers, hydrating the skin. Aloe also makes the surface of the skin smoother because of its cohesive effect on the superficial flaking epidermal cells by sticking them together. (Dr Peter Atherton M.B.Ch.B., Positive Health issue 20 June/July 1997).

Aloe Vera is absorbed by the skin up to four times faster than water and moisturizes the skin because of its water holding capacity. (Danhof, I.E., McAnally, B.H. (1983), Stabilized Aloe Vera: Effect on Human Skin Cells. Drug. Cosmet. Ind. 133, 52-106).

In the United States Aloe Vera is grown commercially in California, Florida, Texas and in specially-designed greenhouses in Oklahoma.

Only the purest Emu Oil is used in Blue Stuff products. Because Emu Oil is quickly absorbed into the skin, it is wonderful for topical application. Emu Oil leaves no oily residue - only naturally hydrated skin tissue.

**Product Ingredients:** Whole Leaf Aloe Vera Concentrate, Purified Water, Squalene, Emu Oil, Glyceryl Stearate, Lanolin Alcohol, Propylene Glycol, Sorbitan Sesquileate, Stearic Acid, Dimethicone, PEG-75 Lanolin, Allantoin, Polysorbate-60, Peach Kernel Oil, Apricot Kernel Oil, Sesame Seed Oil, Jojoba Oil, Carbomer-940, Triethanolamine, Methylparaben, Fragrance, Imidazolidinyl Urea, Propylparaben

## Body Moisturizer with Emu Oil

---

**Whole Leaf Aloe Vera Concentrate** - Aloe Vera is used externally to treat various skin conditions such as cuts, burns and eczema. It is commonly believed that sap from Aloe vera eases pain and reduces inflammation.

### Purified Water

**Squalene** - Used in cosmetics as an oil free and natural moisturizer. Squalene makes up 12% of sebum. Sebum is produced by our bodies to protect and waterproof hair and skin. It also keeps hair and skin from becoming cracked, dry or brittle. It discourages the growth of bacteria on skin.

**Emu Oil** - Used topically as a unique, 100% natural moisturizer. Emu oil reduces the visible signs of aging.

**Glyceryl Stearate** - Glyceryl Stearate serves as an emulsifier and is used to soften and smooth the skin.

**Lanolin Alcohol** - Lanolin is the fat that is pressed off of the wool of the sheep. Lanolin is non-drying and is used to soften skin.

**Propylene Glycol** - In the skin and hair, propylene glycol works as a humescent, which causes retention of moisture content of skin or cosmetic products by preventing the escape of moisture or water. It forms the base for some of our products and has a long history of safety.

**Sorbitan Sesquioleate** - This ingredient is a mixture of esters, an organic compound, of Sorbitol and Oleic Acid. Sorbitol comes from fruit and berries and is used to dissolve oil into water.

**Dimethicone** - A silicone oil used in hair and skin care products. Adds shine to the hair and a slippery feeling to skin products

**PEG-75 Lanolin** - Lanolin is an oil-based, yellow substance that comes from wool-bearing animals. It acts as a skin ointment to sooth skin and sometimes for waterproofing. Recent studies have shown that antibiotics are present in lanolin. It can be used to treat dry and itchy skin.

**Allantoin** - Allontoin is used to encourage the growth of healthy tissue, to aid the body in healing wounds and in fighting skin irritations. Allantoin promotes healthy skin and because of this it is often found in anti-acne products, sun care products and lotions that promote healthy skin.

**Peach Kernel Oil** - Peach Kernel Oil possesses wonderful revitalizing, nourishing, and regenerative moisturizing properties. In addition it helps prevent dehydration, smoothes wrinkles and encourages elasticity and suppleness in all skin types. It is especially beneficial for sensitive or inflamed skin, such as with eczema or psoriasis conditions and exposure to sun or wind, and also delicate or mature complexions. Its regenerative and tonic effects help to cleanse and tighten the pores of the skin.

**Apricot Kernel Oil** - Apricot Kernel Oil is great for all skin types as an emollient and is best known for its ability to soften, soothe, and re-condition the skin. It is suitable for sensitive and prematurely aged skin.

**Sesame Seed Oil** - Research has shown that Sesame Seed Oil is a powerful antioxidant. It is known to penetrate the skin quickly. In addition it has been known to: help sufferers of psoriasis; help with dry skin; kill lice in the hair of children; act as a natural UV protector; calm the skin after sun or wind burns; keep the skin supple, soft and young looking; tighten skin as it ages; protect the skin against rashes

**Joboba Oil** - It is wonderful for the skin because it has absorption properties that are similar to our skins own sebum (skins natural oil). It is used effectively for skin and hair to: condition; moisturize; soften; reduce wrinkles and stretch marks; lighten and help heal scars; promote healthy scalp and hair; lubricate and protect skin and hair

**Inactive Ingredients:** Triethanolamine, Polysorbate-60, Carbomer 940, Methylparaben, Imidazolidinyl Urea, Propylparaben, Fragrance, Stearic Acid
