

Lip Balm with Emu Oil

#SC-116

Size: .15 ounce tube

Improve the Health of Your Lips with our All Natural Lip Balm

Lip Balm with Emu Oil by Blue Spring is a unique combination of 5 nourishing oils: Emu, Castor Seed, Safflower Seed, Jojoba, and Mandarin Orange Peel. This exclusive blend is combined with natural Beeswax, Mango Butter, Squalene, Shea/Aloe Vera Butter, Vitamin E Tocopherol and Camphor to produce the following beneficial results:

- Slides on, no sticky or oily feel
- Moisturizes & Hydrates cracked or chapped lips
- Softens and improves damaged skin
- Encourages skin healing
- Seals and protects
- Soothes Deeply
- Protects from Harsh effects of environment
- Anti-aging
- Reduces inflammation
- Hydrates naturally

The Positive Qualities of Lip Balm with Emu Oil by Blue Spring are:

- Absorbs quickly *
 - Non-oily **
 - Beneficial for inflamed or sensitive skin as well as mature or delicate skin
 - Comes in convenient tube
 - Natural fragrance
- * Aloe Vera is absorbed by the skin up to four times faster than water and moisturizes because of its water holding capacity.
- ** Emu Oil leaves no oily residue - only naturally hydrated skin tissue.

Directions for use: Apply Lip Balm with Emu Oil liberally to lips as often as needed, particularly in dry, cold, windy or harsh conditions. Great for use in any season.

Tips for best use:

- Apply regularly to soothe, protect and regenerate
- Purchase Several - Keep in multiple locations for ease of use
- Remember: Because of the natural oils it will melt if exposed to extreme heat

Lip Balm with Emu Oil by Blue Spring is guaranteed to give you maximum results. We have so much confidence in our Lip Balm with Emu Oil that we back it up with our Blue Spring 60 day money back guarantee.

Remember to keep your lips healthy by:

- Protecting from Sun, Cold, Wind
- Don't lick your lips
- Keep Lip Balm with Emu Oil easily available and enjoy soft, healthy lips

Product Ingredients: Carthamus Tinctorium (Safflower) Seed Oil, Petrolatum, Squalane, Paraffin, Butyrospermum Parkii (Shea Butter), Emu Oil, Beeswax, Tocopherol (Vitamin E), Aloe Barbadensis Extract, Camphor, Simmondsia Chinensis (Jojoba) Oil, Citrus Nobilis (Mandarin Orange) Peel Oil, Propylparaben, FD&C Red 17, FD&C Yellow 11

Lip Balm with Emu Oil

Carthamus Tinctorium (Safflower) Seed Oil - Safflower oil is a highly moisturizing oil with an exceptionally high amount of Oleic acids. Oleic acid is a monounsaturated omega-9 fatty acid. Monounsaturated fatty acids are found in natural foods. It is deeply soothing and one of the first choices for skin care recipes requiring moisturizing benefits.

Petrolatum - Petrolatum is semi-solid mixture of hydrocarbons. A hydrocarbon is a chemical compound that consists only of the elements carbon and hydrogen. It is used in medicinal ointments and for lubrication. It was discovered in 1859 and used for cuts and burns because it promoted healing. It is colorless and has no taste or smell. It does not oxidize on exposure to the air and is insoluble in water.

Squalane - A natural organic compound, which is often taken from shark liver oil. However, it also comes from plant sources such as rice bran, wheat germ and olives. Humans produce squalene in their bodies. Squalene is often used in cosmetics as an oil free and natural moisturizer. Squalene makes up 12% of sebum. Sebum is produced by our bodies to protect and waterproof hair and skin. It also keeps hair and skin from becoming cracked, dry or brittle. It discourages the growth of bacteria on skin.

Paraffin - A waxy crystalline substance obtained from wood, coal, petroleum, or shale oil. It is a complex mixture of hydrocarbons. A hydrocarbon is a chemical compound that consists only of the elements carbon and hydrogen. It is used in medicinal ointments and for lubrication. Paraffin in its liquid form is used as a skin moisturizer.

Butyrospermum Parkii (Shea Butter) - Shea comes from the nut of a tree that is grown in Africa. Shea butter is an excellent emollient. Emollients have the power of softening, relaxing and soothing the skin. Shea butter has a rich content of esters. Esters are any one of a group of organic compounds that are formed by the reaction between an alcohol and an acid. The benefits of the Esters in Shea Butter include anti-irritant, anti-inflammatory and enhanced UV-B protection.

Emu Oil - Used topically as a unique, 100% natural moisturizer.

Beeswax - A product from the bee hive of a honeybee. Beeswax is natural and made by the bees in the cell walls of the honeycomb of the bee hive. It is a natural emulsifier, which means it stabilizes unblendable substances. It has a natural smell and color and helps to seal and protect the skin.

Tocopherol (Vitamin E) - Fat-soluble vitamin that is an important antioxidant. Vitamin E is often used because it is commonly believed to play a role in encouraging skin healing and reducing scarring after injuries such as burns.

Aloe Barbadensis Extract - Aloe Vera is used externally to treat various skin conditions such as cuts, burns and eczema. It is commonly believed that sap from Aloe vera eases pain and reduces inflammation.

Camphor - A white transparent waxy crystalline solid. It is found in the wood of a large evergreen tree found in Asia. Camphor is readily absorbed through the skin and produces a feeling of cooling and acts as slight local anesthetic and antimicrobial substance. Anesthetics are used to block the perception of pain and other sensations. An antimicrobial is a substance that kills or inhibits the growth of microbes such as bacteria, fungus, viruses or parasites.

Simmondsia Chinensis (Jojoba) Oil - It is used effectively for skin and hair to: cleanse; condition; moisturize; soften; reduce wrinkles and stretch marks; lighten and help heal scars; promote healthy scalp and hair; lubricate and protect skin and hair

Citrus Nobilis (Mandarin Orange) Peel Oil - Mandarin oil is an essential oil used for dull skin, oily skin, scars, spots, stress and wrinkles.

Propylparaben - This ingredient is used for as a preservative and to prevent microbial growth.

Inactive Ingredients: FD&C Red 17; FD&C Yellow 11
