

All-Natural Rosemary & Lavender Handcrafted Soap with Emu Oil

#SC-175

Let the gentle fragrance of rosemary energize your mind while aiding with clearing the respiratory tract. It gently cleans and moisturizes the skin leading to a more beautiful you.

BLUESPRING's all-natural Rosemary & Lavender Handcrafted Soap with rosemary essential oil aids with the skin's regenerating powers. Many have found it helpful with chronic skin conditions as well as aiding in moisturizing dry skin and the fight against wrinkles.

This rich soap also contains lavender essential oil which not only moisturizes to help fight wrinkles but features antiseptic and antifungal properties which makes it helpful in relieving acne and psoriasis.

Rosemary and Lavender Soap also contains a rich and nourishing blend of five oils, olive, coconut, palm emu and castor seed, plus beeswax. These natural oils aid in keeping the skin soft and moisturized. Beeswax contains wax esters which are also found in human skin. This makes it readily absorbed and promotes skin moisture and also provides a natural defense to sun, wind and other irritants.

When these rich oils and beeswax are combined with rosemary and lavender, the final result is a gentle soap that invigorates the mind while soothing away tension. It is designed to gently cleans and moisturize and leaves the skin feeling soft.

Ingredients: Olive Oil, Coconut Oil, Palm Oil, Emu Oil, Castor Seed Oil, Beeswax, Stearic Acid, Water, Sodium Hydroxide, Lavender Essential Oil, Rosemary Essential Oil, ground Lavender Petals and ground Rosemary.

Rosemary & Lavender Soap

Olive Oil - One of the best oils to make soap with. Oil varies in color depending on the olive crop and can be golden to dark green. Packed with vitamins, minerals, and protein. The soaps made from olive oil have small bubbles but are mild and creamy.

Coconut Oil - An excellent skin moisturizer and softener.

Palm Oil - A pale yellow semi-solid oil that is a great base for soapmaking. Adds firmness to soap and creates a bar that is creamy and produces small bubbles that clean well.

Emu Oil - Used topically as a unique, 100% natural moisturizer. Emu oil reduces the visible signs of aging.

Castor Seed Oil - Serves as an emollient which acts as a lubricant on the skin surface, giving the skin a soft and smooth appearance.

Beeswax - It is a natural emulsifier, which means it stabilizes unblendable substances. It has a natural smell and color and helps to seal and protect the skin.

Stearic Acid - A naturally derived fatty acid used as a thickener and co-emulsifier. Used to produce a pearly effect in shampoos, soaps, and other cosmetic products.

Water

Sodium Hydroxide - Also known as caustic soda. This ingredient is used to neutralize acid and control the PH of the product.

Lavender Essential Oil - Scents that are distilled directly from botanicals.

Rosemary Essential Oil - Scents that are distilled directly from botanicals.

Ground Lavender Petals
