Oatmeal & Honey Emu Oil Soap

#SC-170

Oatmeal and honey handcrafted soap is a rich and nourishing blend of five oils, beeswax, honey and ground oatmeal. Ground oatmeal is a natural exfoliate. Use this soap for mild exfoliating, clarifying and cleansing. It moisturizes as it cleanses. Honey and Beeswax add a sweet natural fragrance.

- Ground Oatmeal
- Honey
- Australian Emu Oil

Ingredients: Olive Oil, Coconut Oil, Palm Oil, Emu Oil, Castor Seed Oil, Beeswax, Stearic Acid, Water, Sodium Hydroxide and Lavender Essential Oil and ground Lavender Petals

Blue Spring Soaps

Olive Oil - One of the best oils to make soap with. Oil varies in color depending on the olive crop and can be golden to dark green. Packed with vitamins, minerals, and protein. The soaps made from olive oil have small bubbles but are mild and creamy.

Coconut Oil - An excellent skin moisturizer and softener.

Palm Oil - A pale yellow semi-solid oil that is a great base for soapmaking. Adds firmness to soap and creates a bar that is creamy and produces small bubbles that clean well.

Emu Oil - Used topically as a unique, 100% natural moisturizer. Emu oil reduces the visible signs of aging.

Castor Seed Oil - Serves as an emollient which acts as a lubricant on the skin surface, giving the skin a soft and smooth appearance.

Beeswax - It is a natural emulsifier, which means it stabilizes unblendable substances. It has a natural smell and color and helps to seal and protect the skin.

Stearic Acid - A naturally derived fatty acid used as a thickener and co-emulsifier. Used to produce a pearly effect in shampoos, soaps, and other cosmetic products.

Water

Sodium Hydroxide - Also known as caustic soda. This ingredient is used to neutralize acid and control the PH of the product.

Lavender Emu Oil Soap

Lavender Essential Oil - Scents that are distilled directly from botanicals.

Ground Lavender Petals

Oatmeal and Honey Emu Oil Soap

Ground Oatmeal - Used to gently exfoliate the skin.

Honey - Real honey acts as an emollient and moisturizes the skin.
